

We affect the growth rate of the token

Separate instruments slightly affect the growth of the cost of the token

COMMUNICATION

01

Active PR campaigns on bitcointalk, Telegram, and exchange trollboxes can create a favorable background to manipulate the market of certain cryptocurrency.

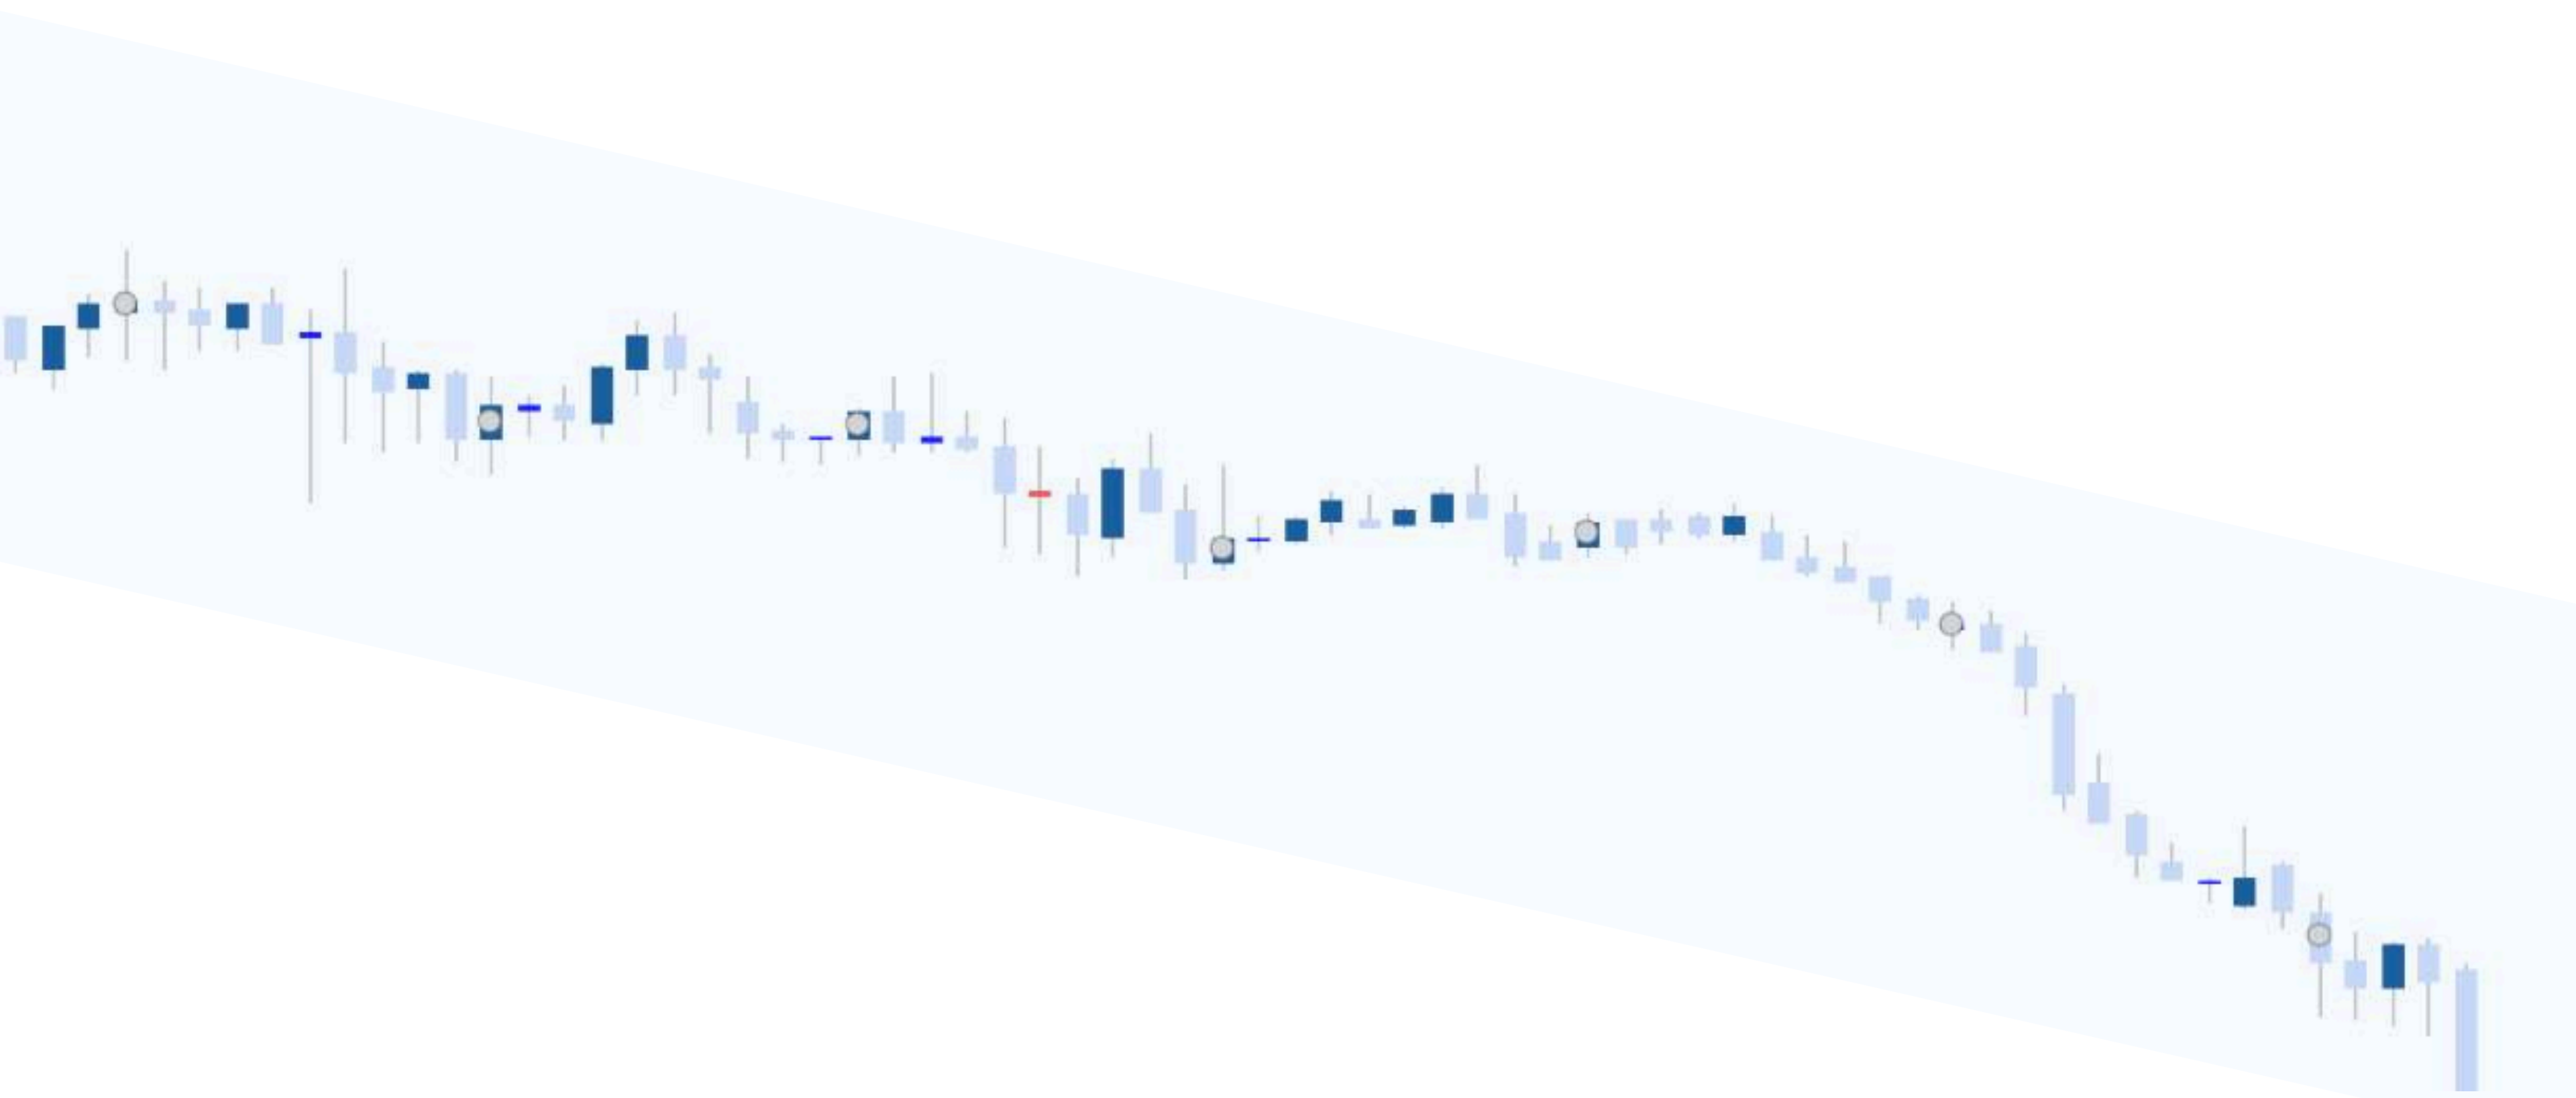

TRADE OPERATIONS

02

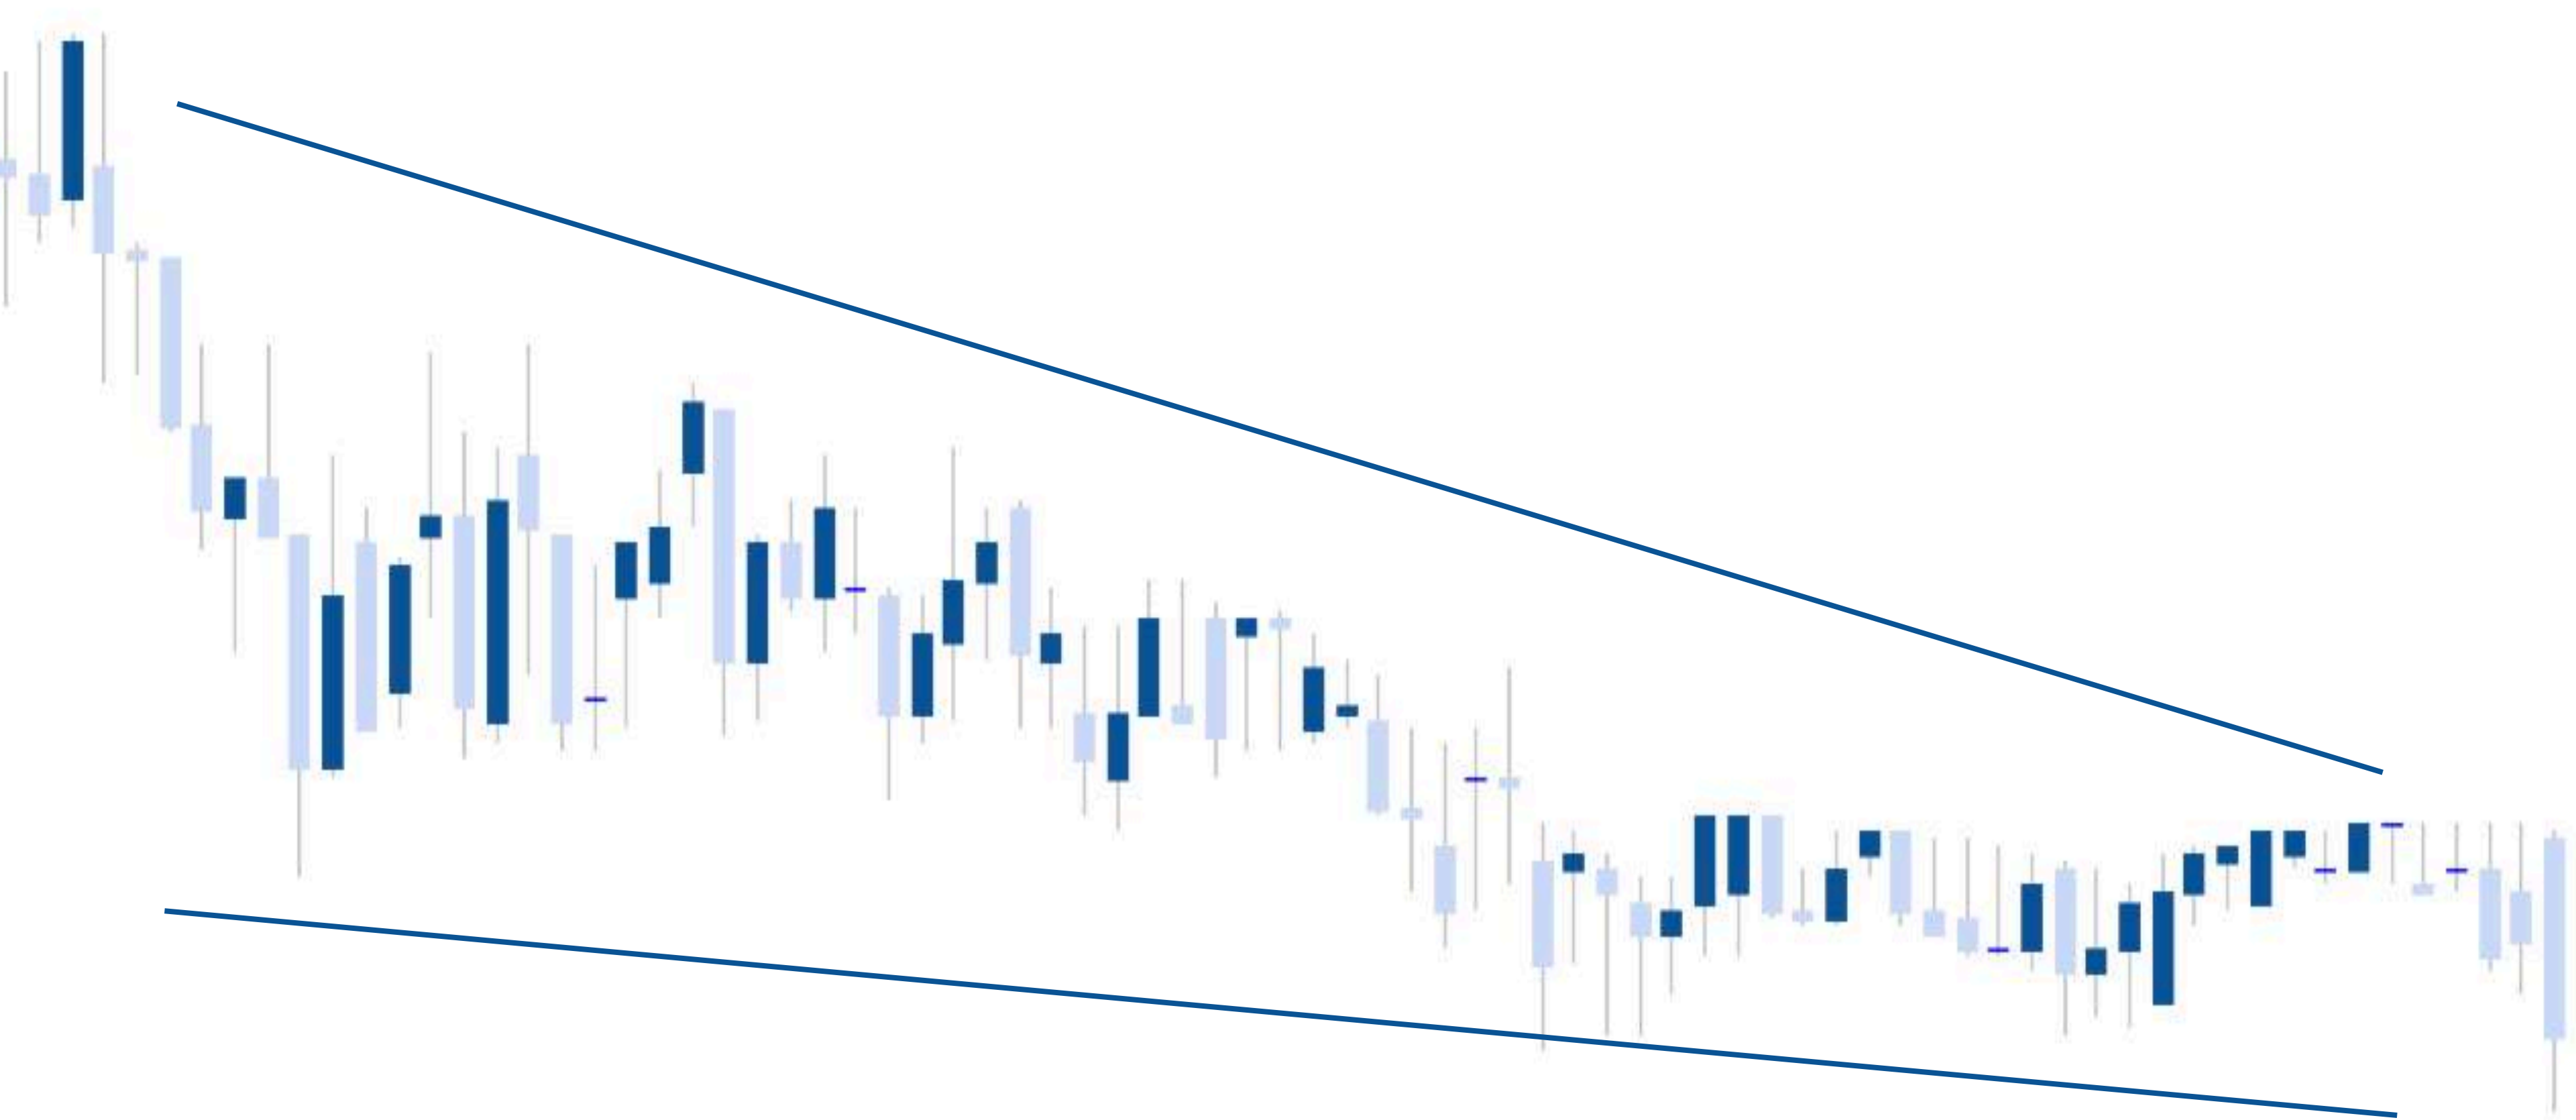

Positive news and communication campaigns without the support of the token trading will not give a serious effect of the growth rate.

LONG-TERM AND TANGIBLE RESULT GIVES ONLY AN INTEGRATED APPROACH

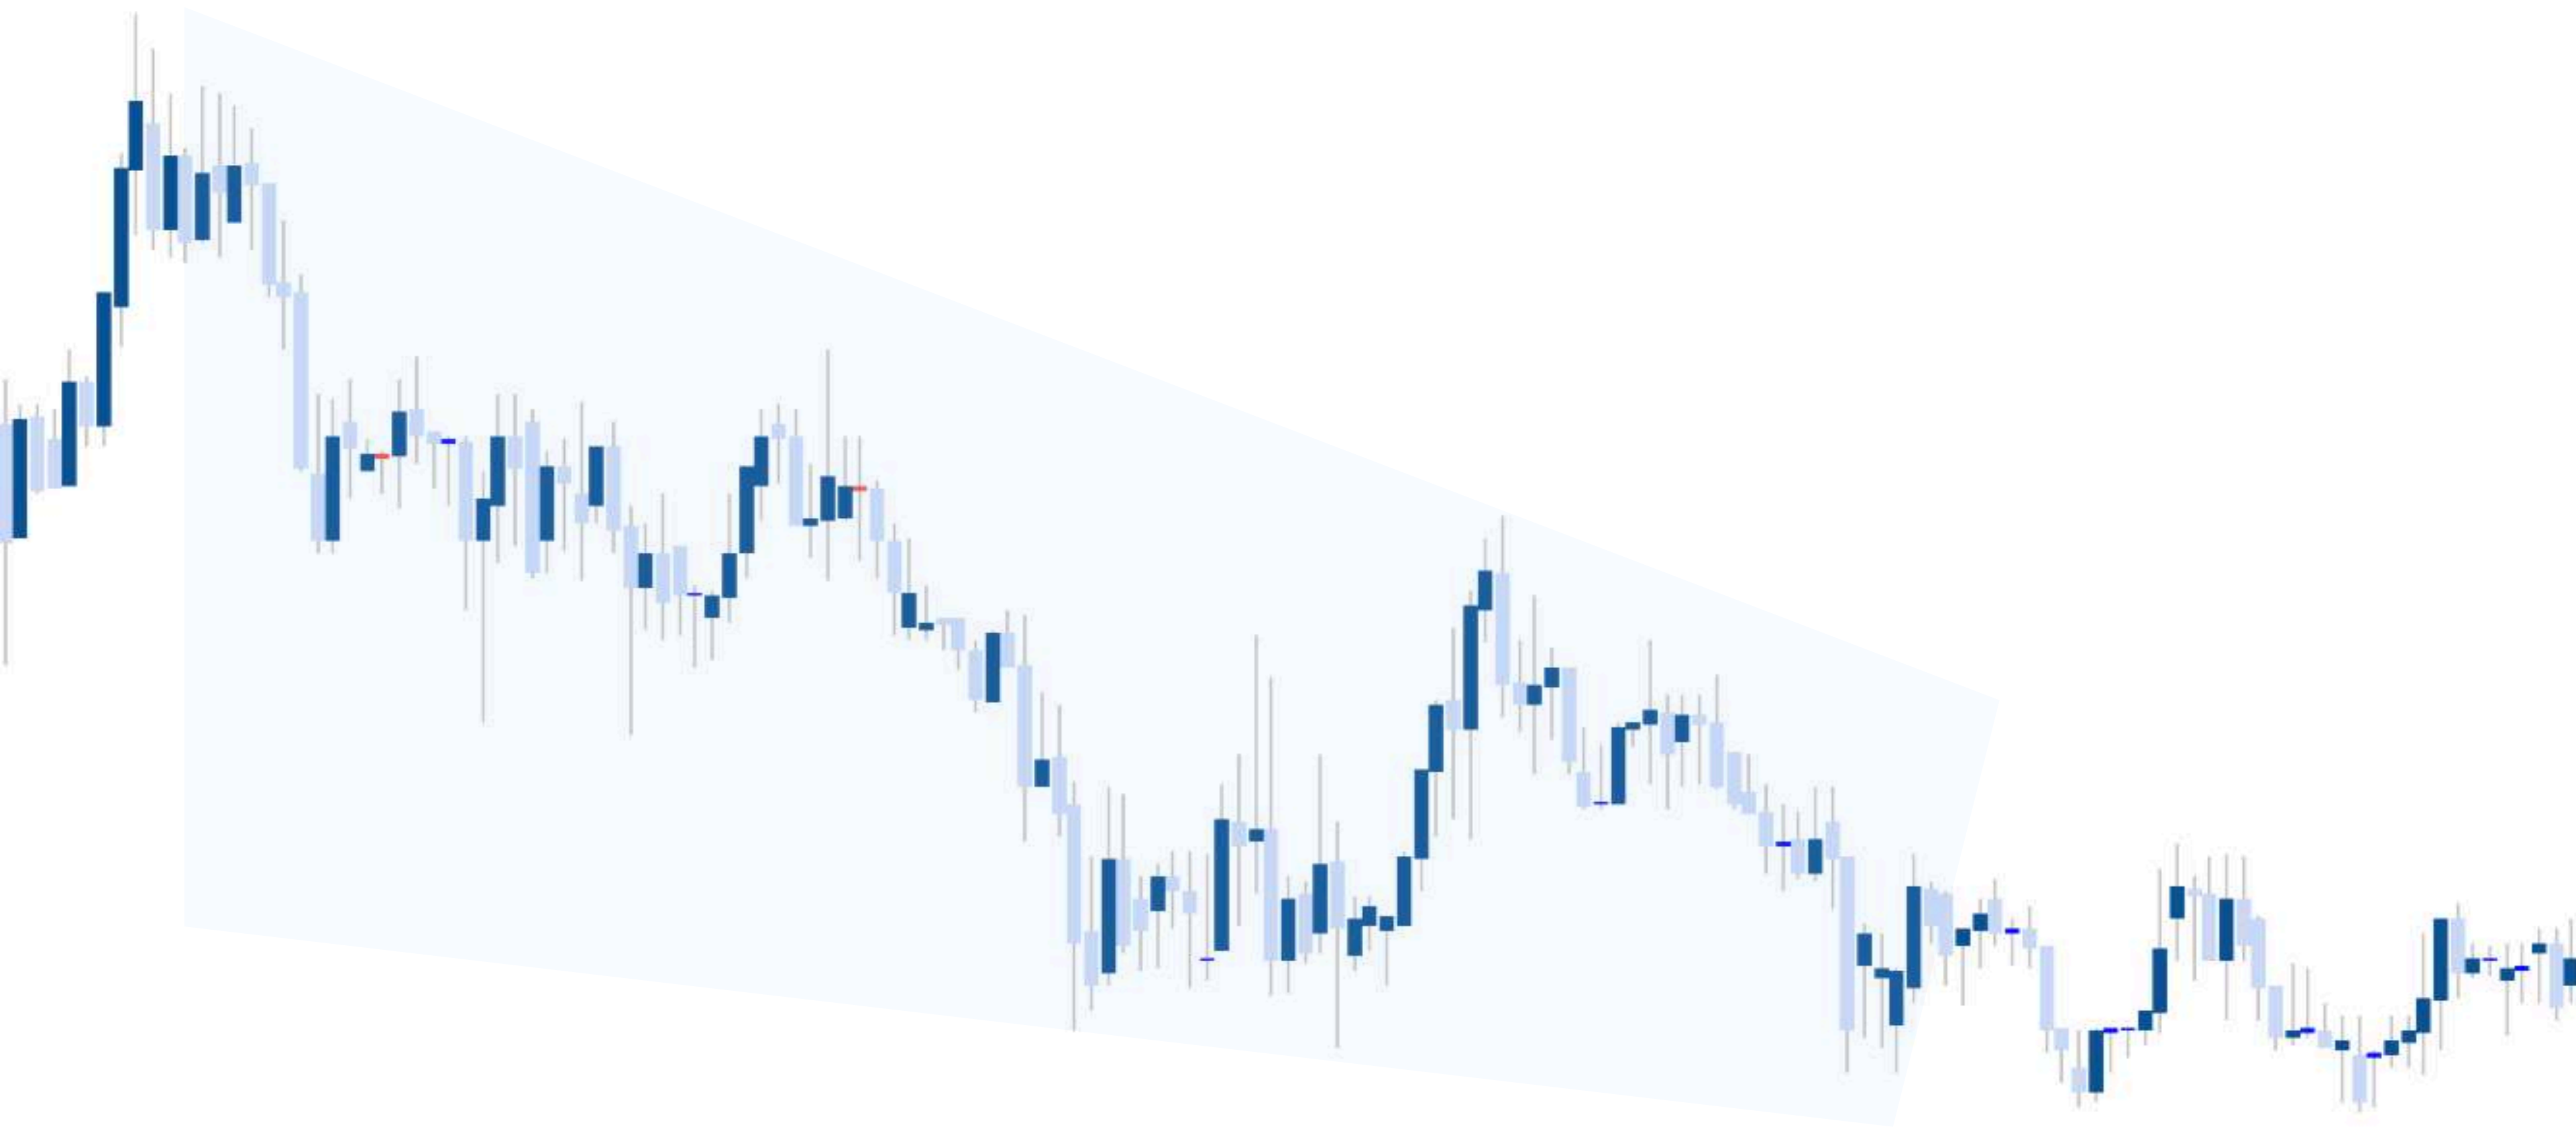

Prevalence of flat during 3 months preceding the work

Prevalence of descending trend during 2 months preceding the work

Dumping after exchange listing before the work

Typical situation

Here we can clearly see a situation when we could break and direct descending trend to increase in short term, using trading tools.

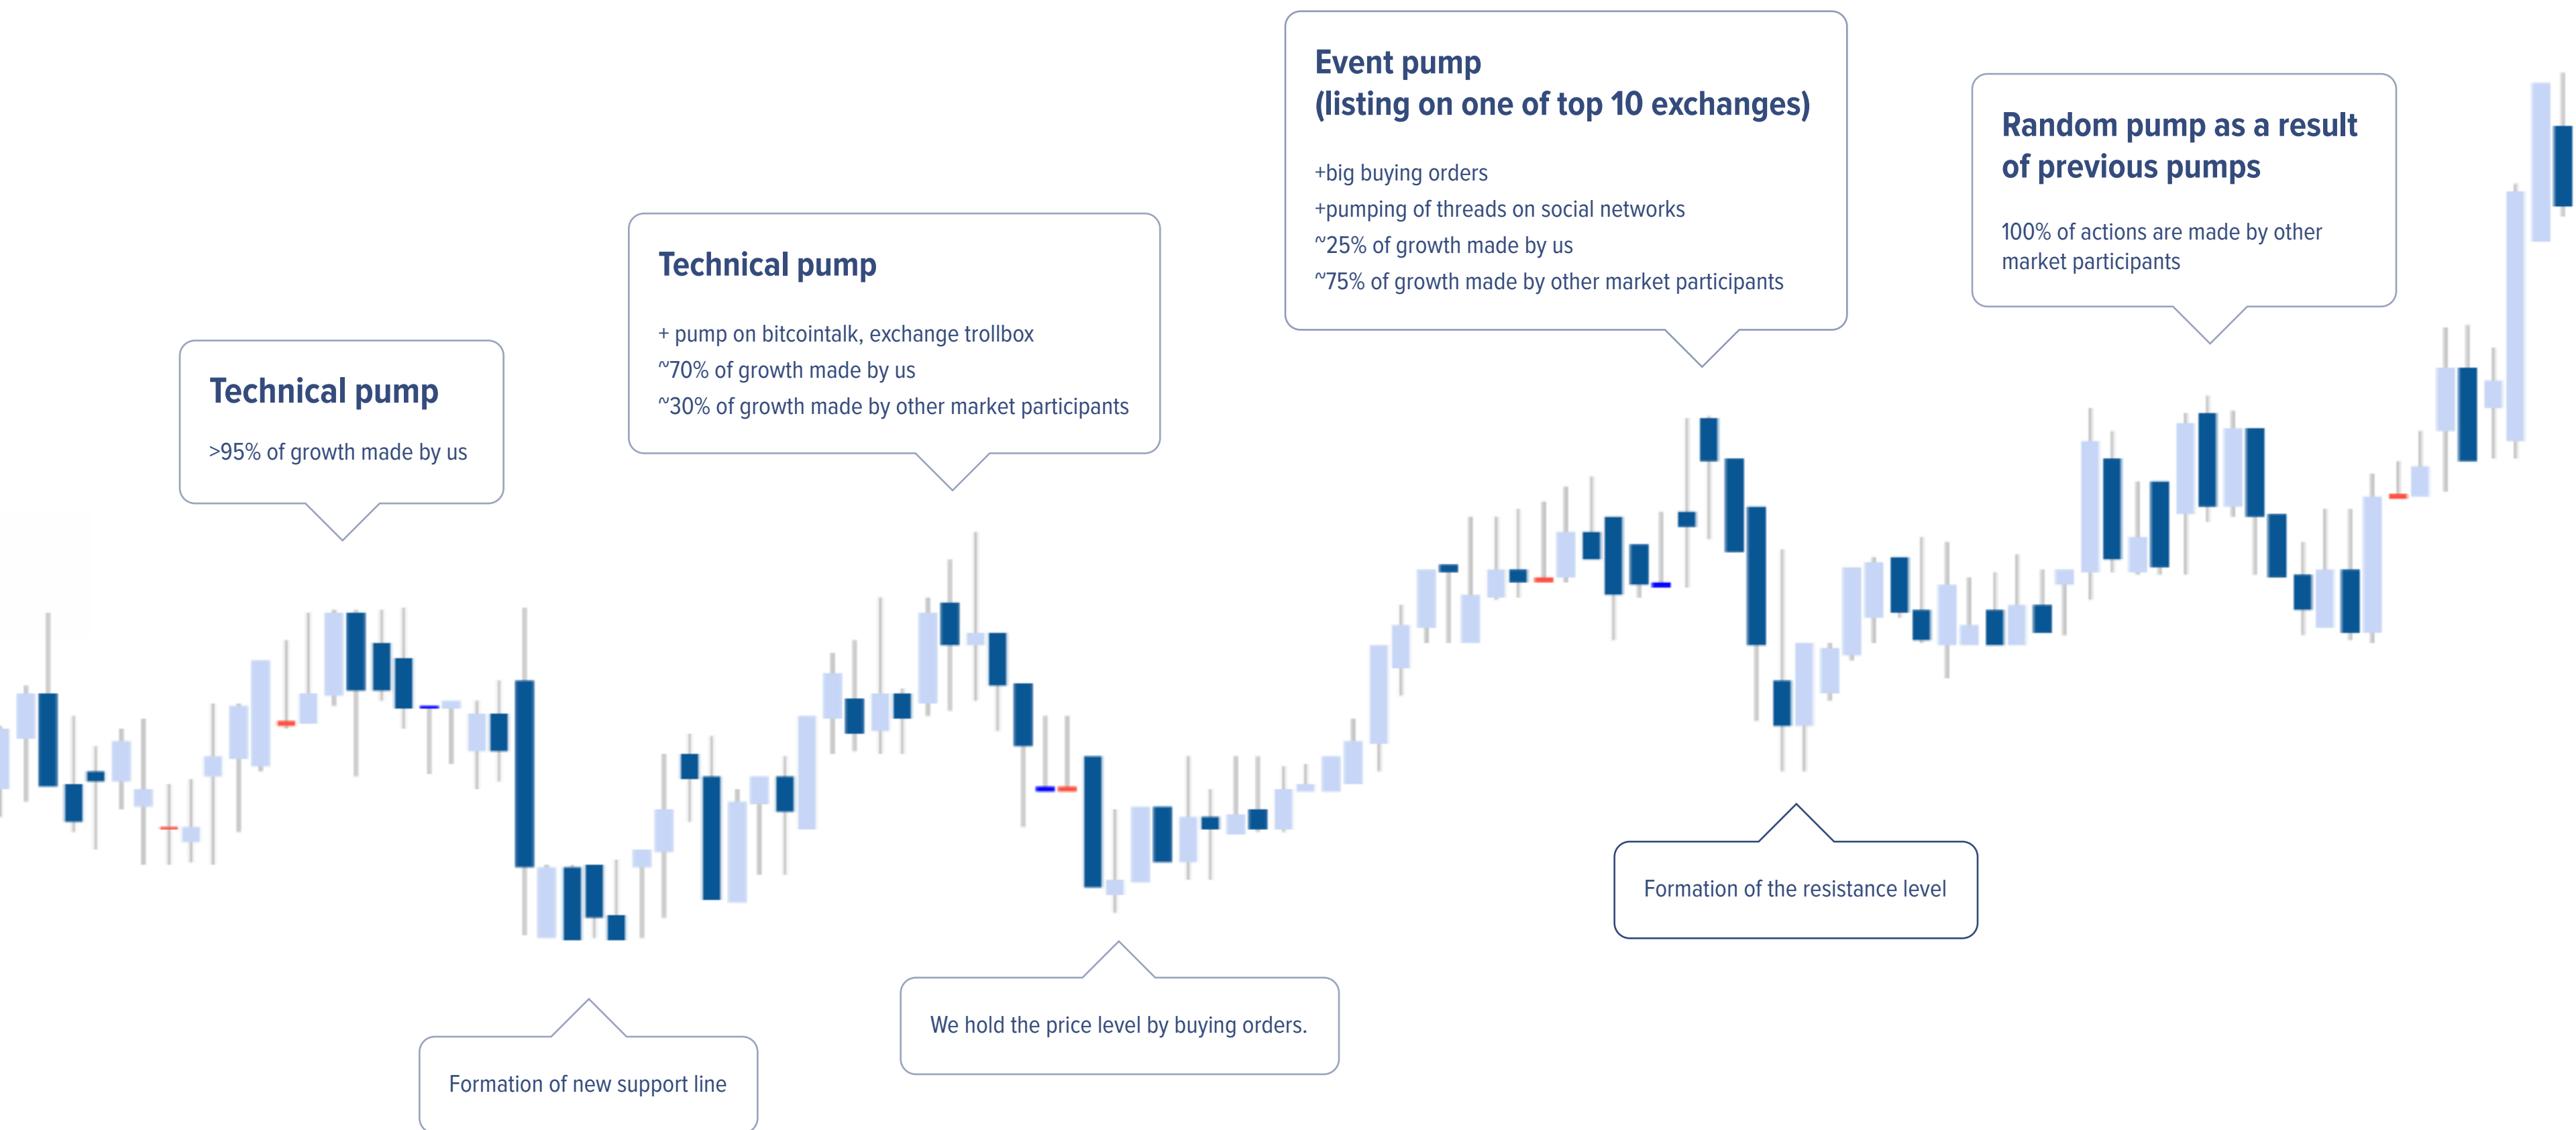

What "pulled" the course down?

ERRORS THAT LEAD TO A DROP IN THE TOKEN RATE

We fix the situation -

LINK WORK TRADING AND COMMUNICATION

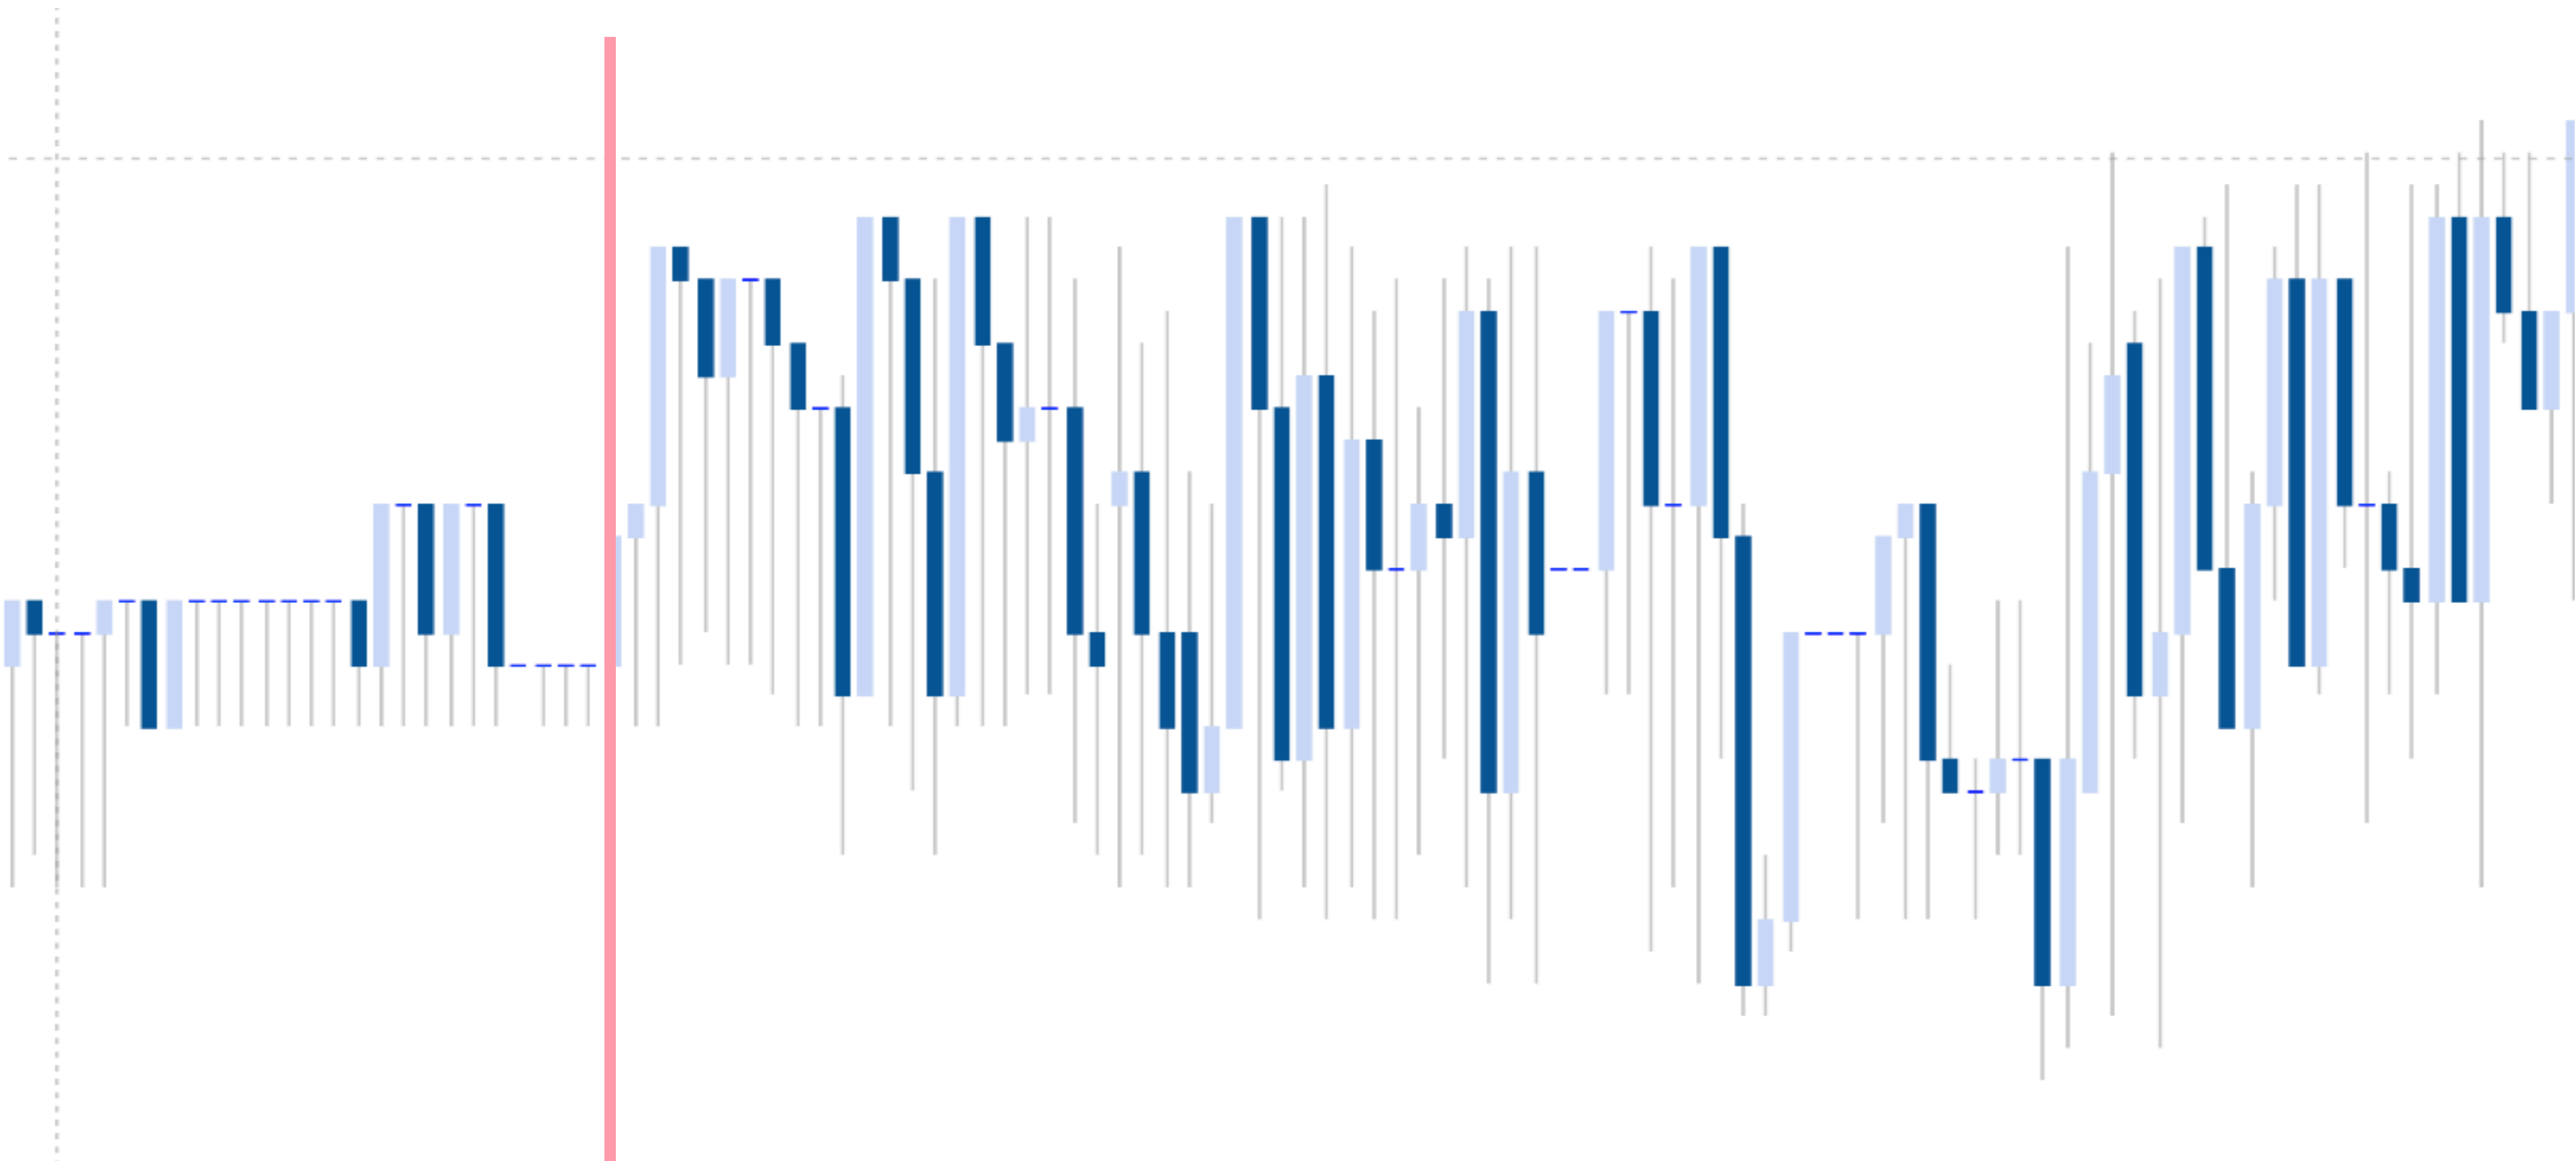

Artificial formation of figures and patterns of technical analysis

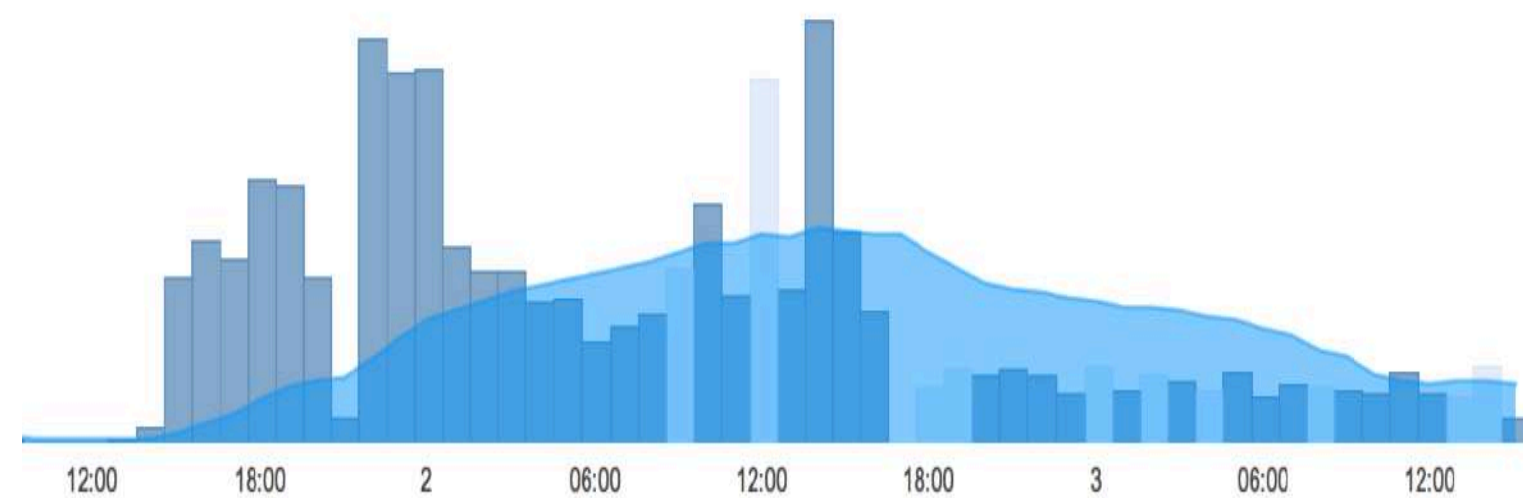

Artificial boosting of the candle amplitude

NATURAL CANDLE AMPLITUDE EXPANDS AT DIFFERENT TIMEFRAMES THROUGH THE HIGH-FREQUENCY TRADING ACTIVITY OF ALGORITHM.

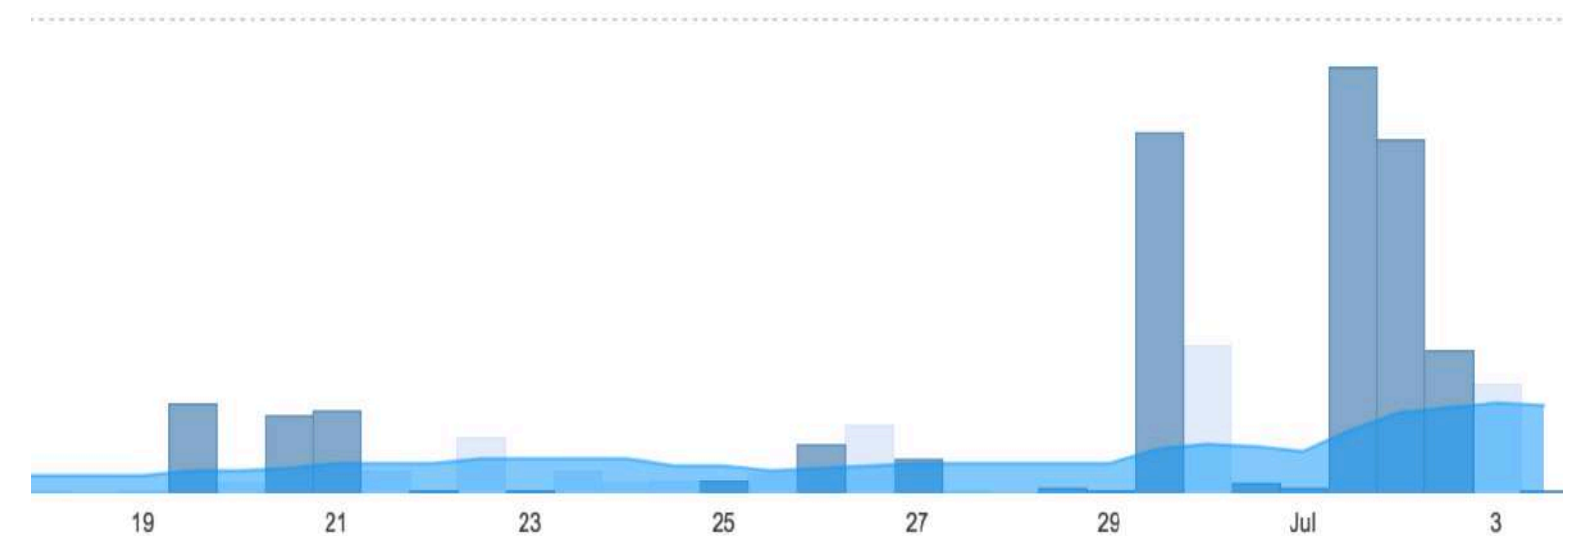

Increase of an average daily trade volume

BOOSTING OF AVERAGE TRADE VOLUME OF THE TOKEN, WHICH INCREASES ASSET LIQUIDITY AND ATTRACTS THE ATTENTION OF THIRD PARTIES ON THE MARKET.

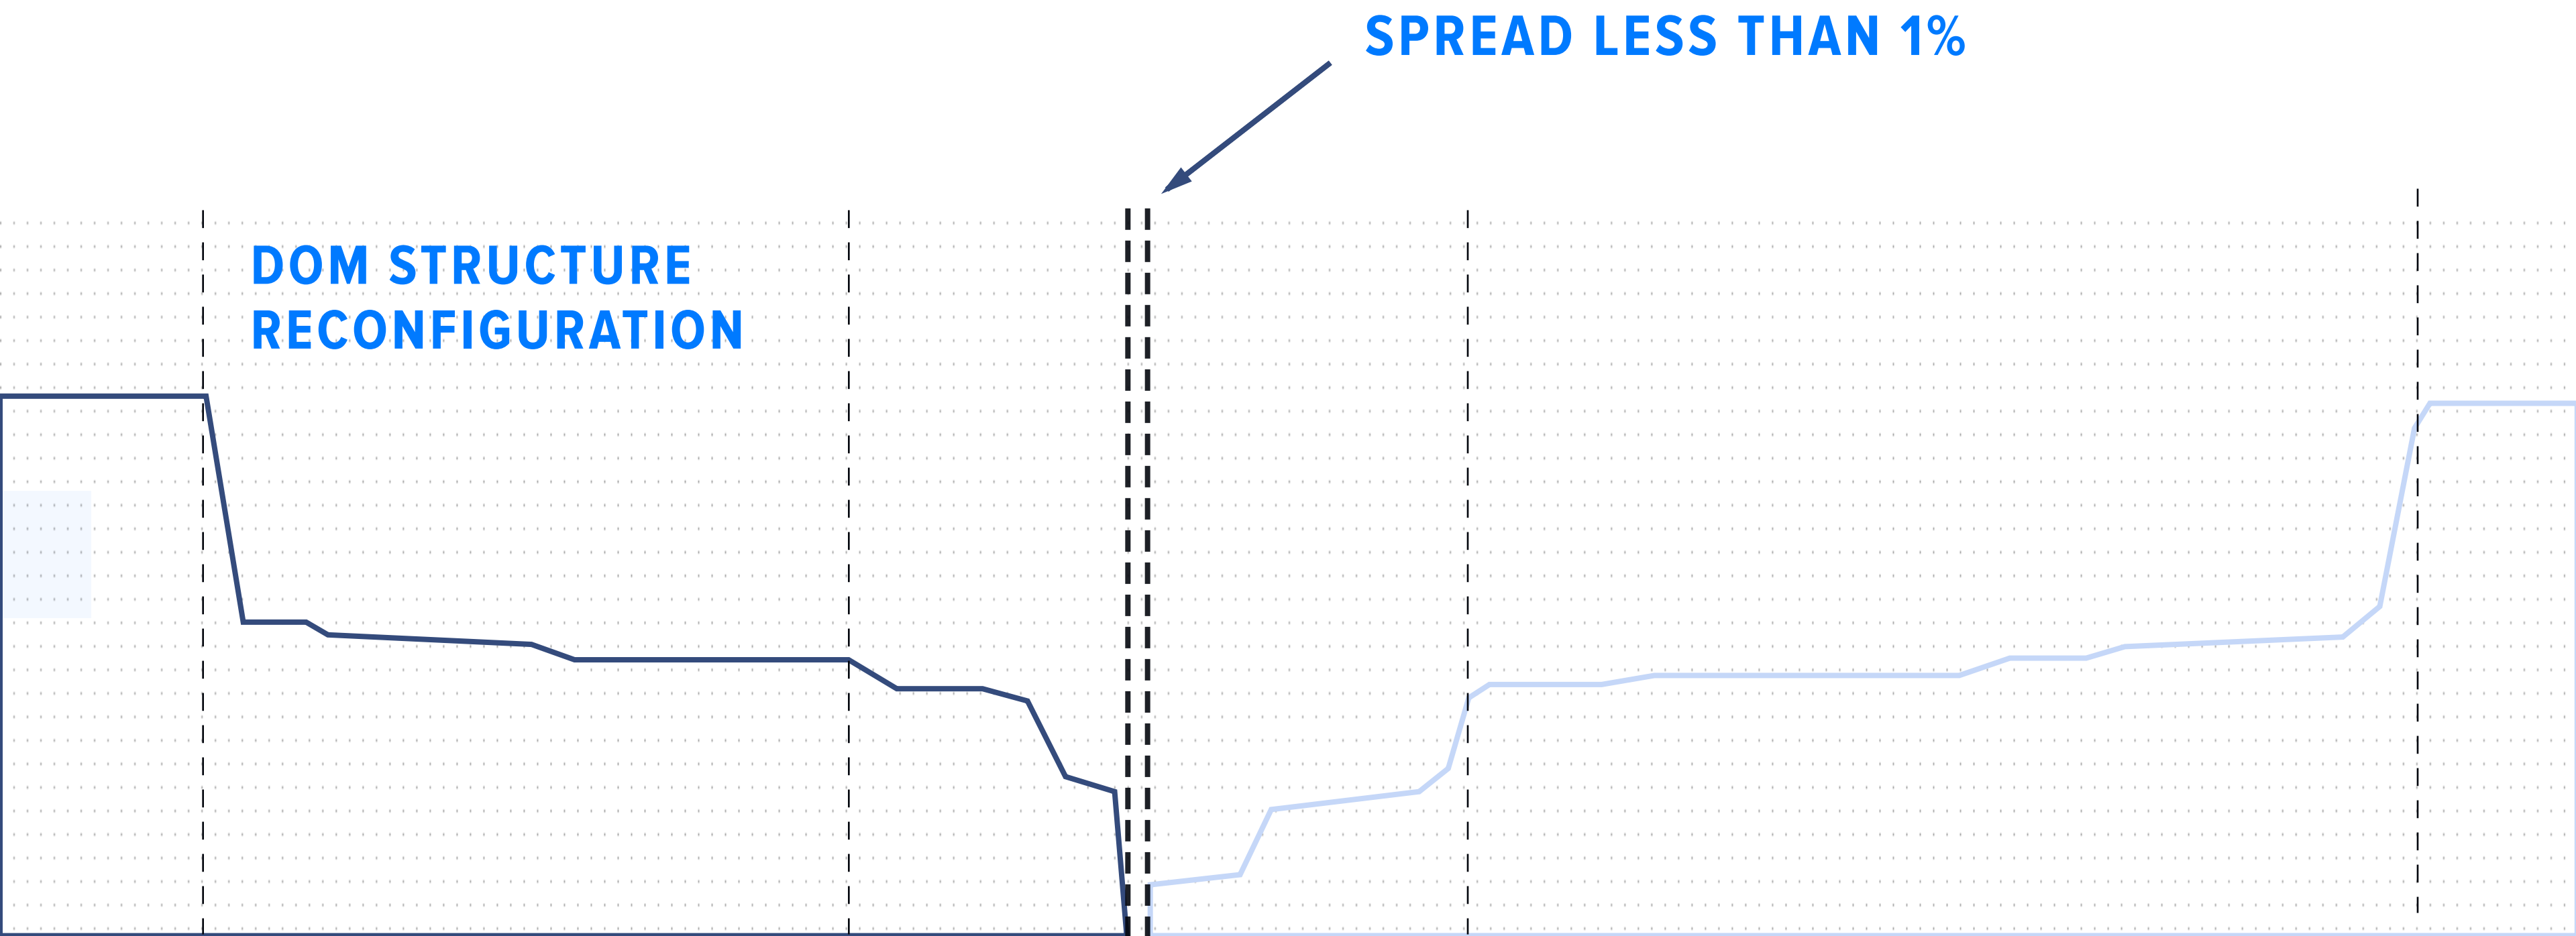

The example of increased volumes
at short timeframes.

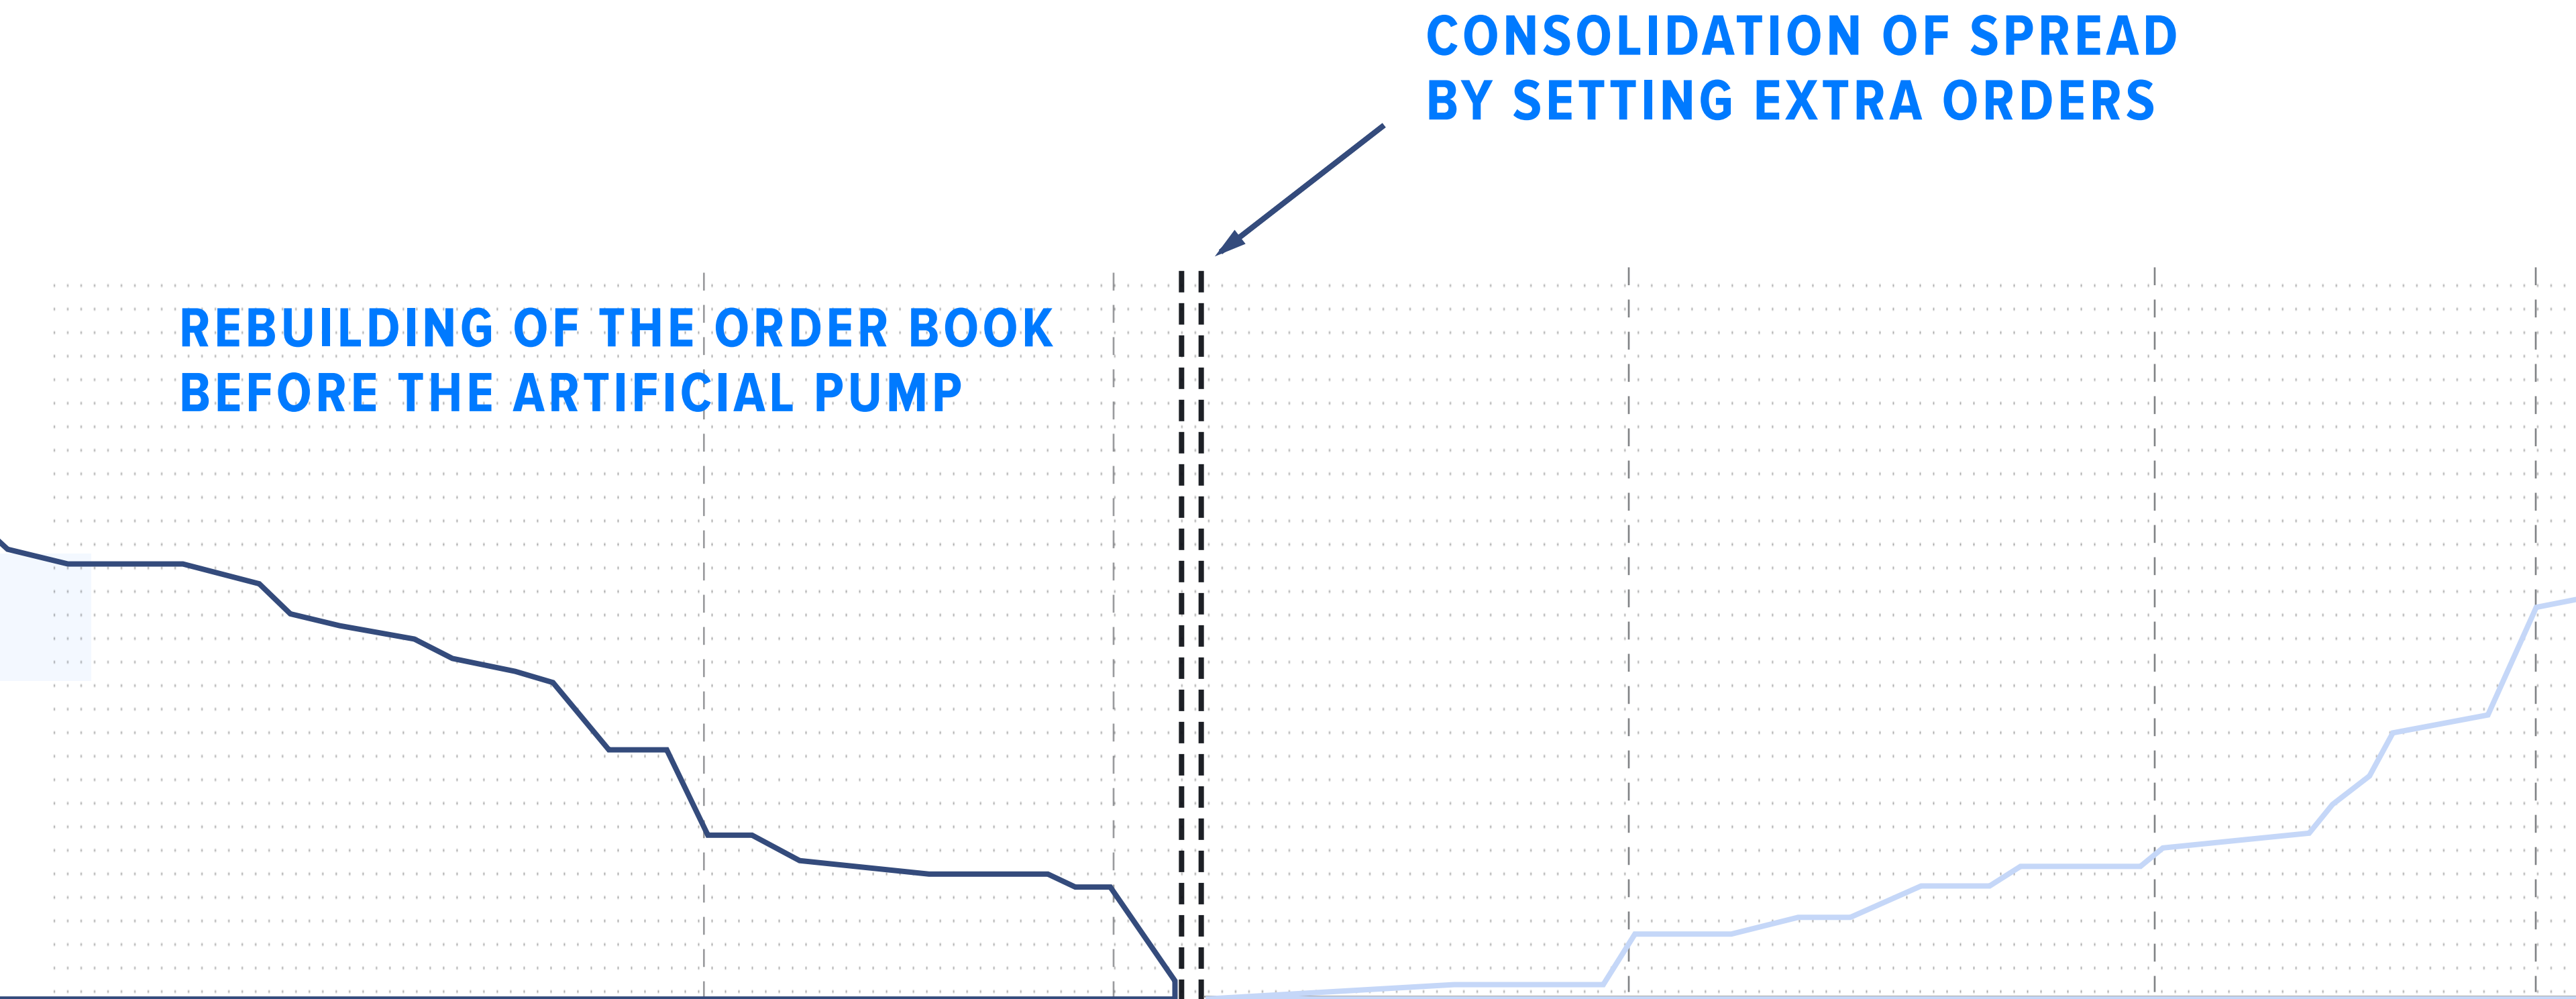

The example of increased volumes
at middle timeframes.

Order book management: stabilization example

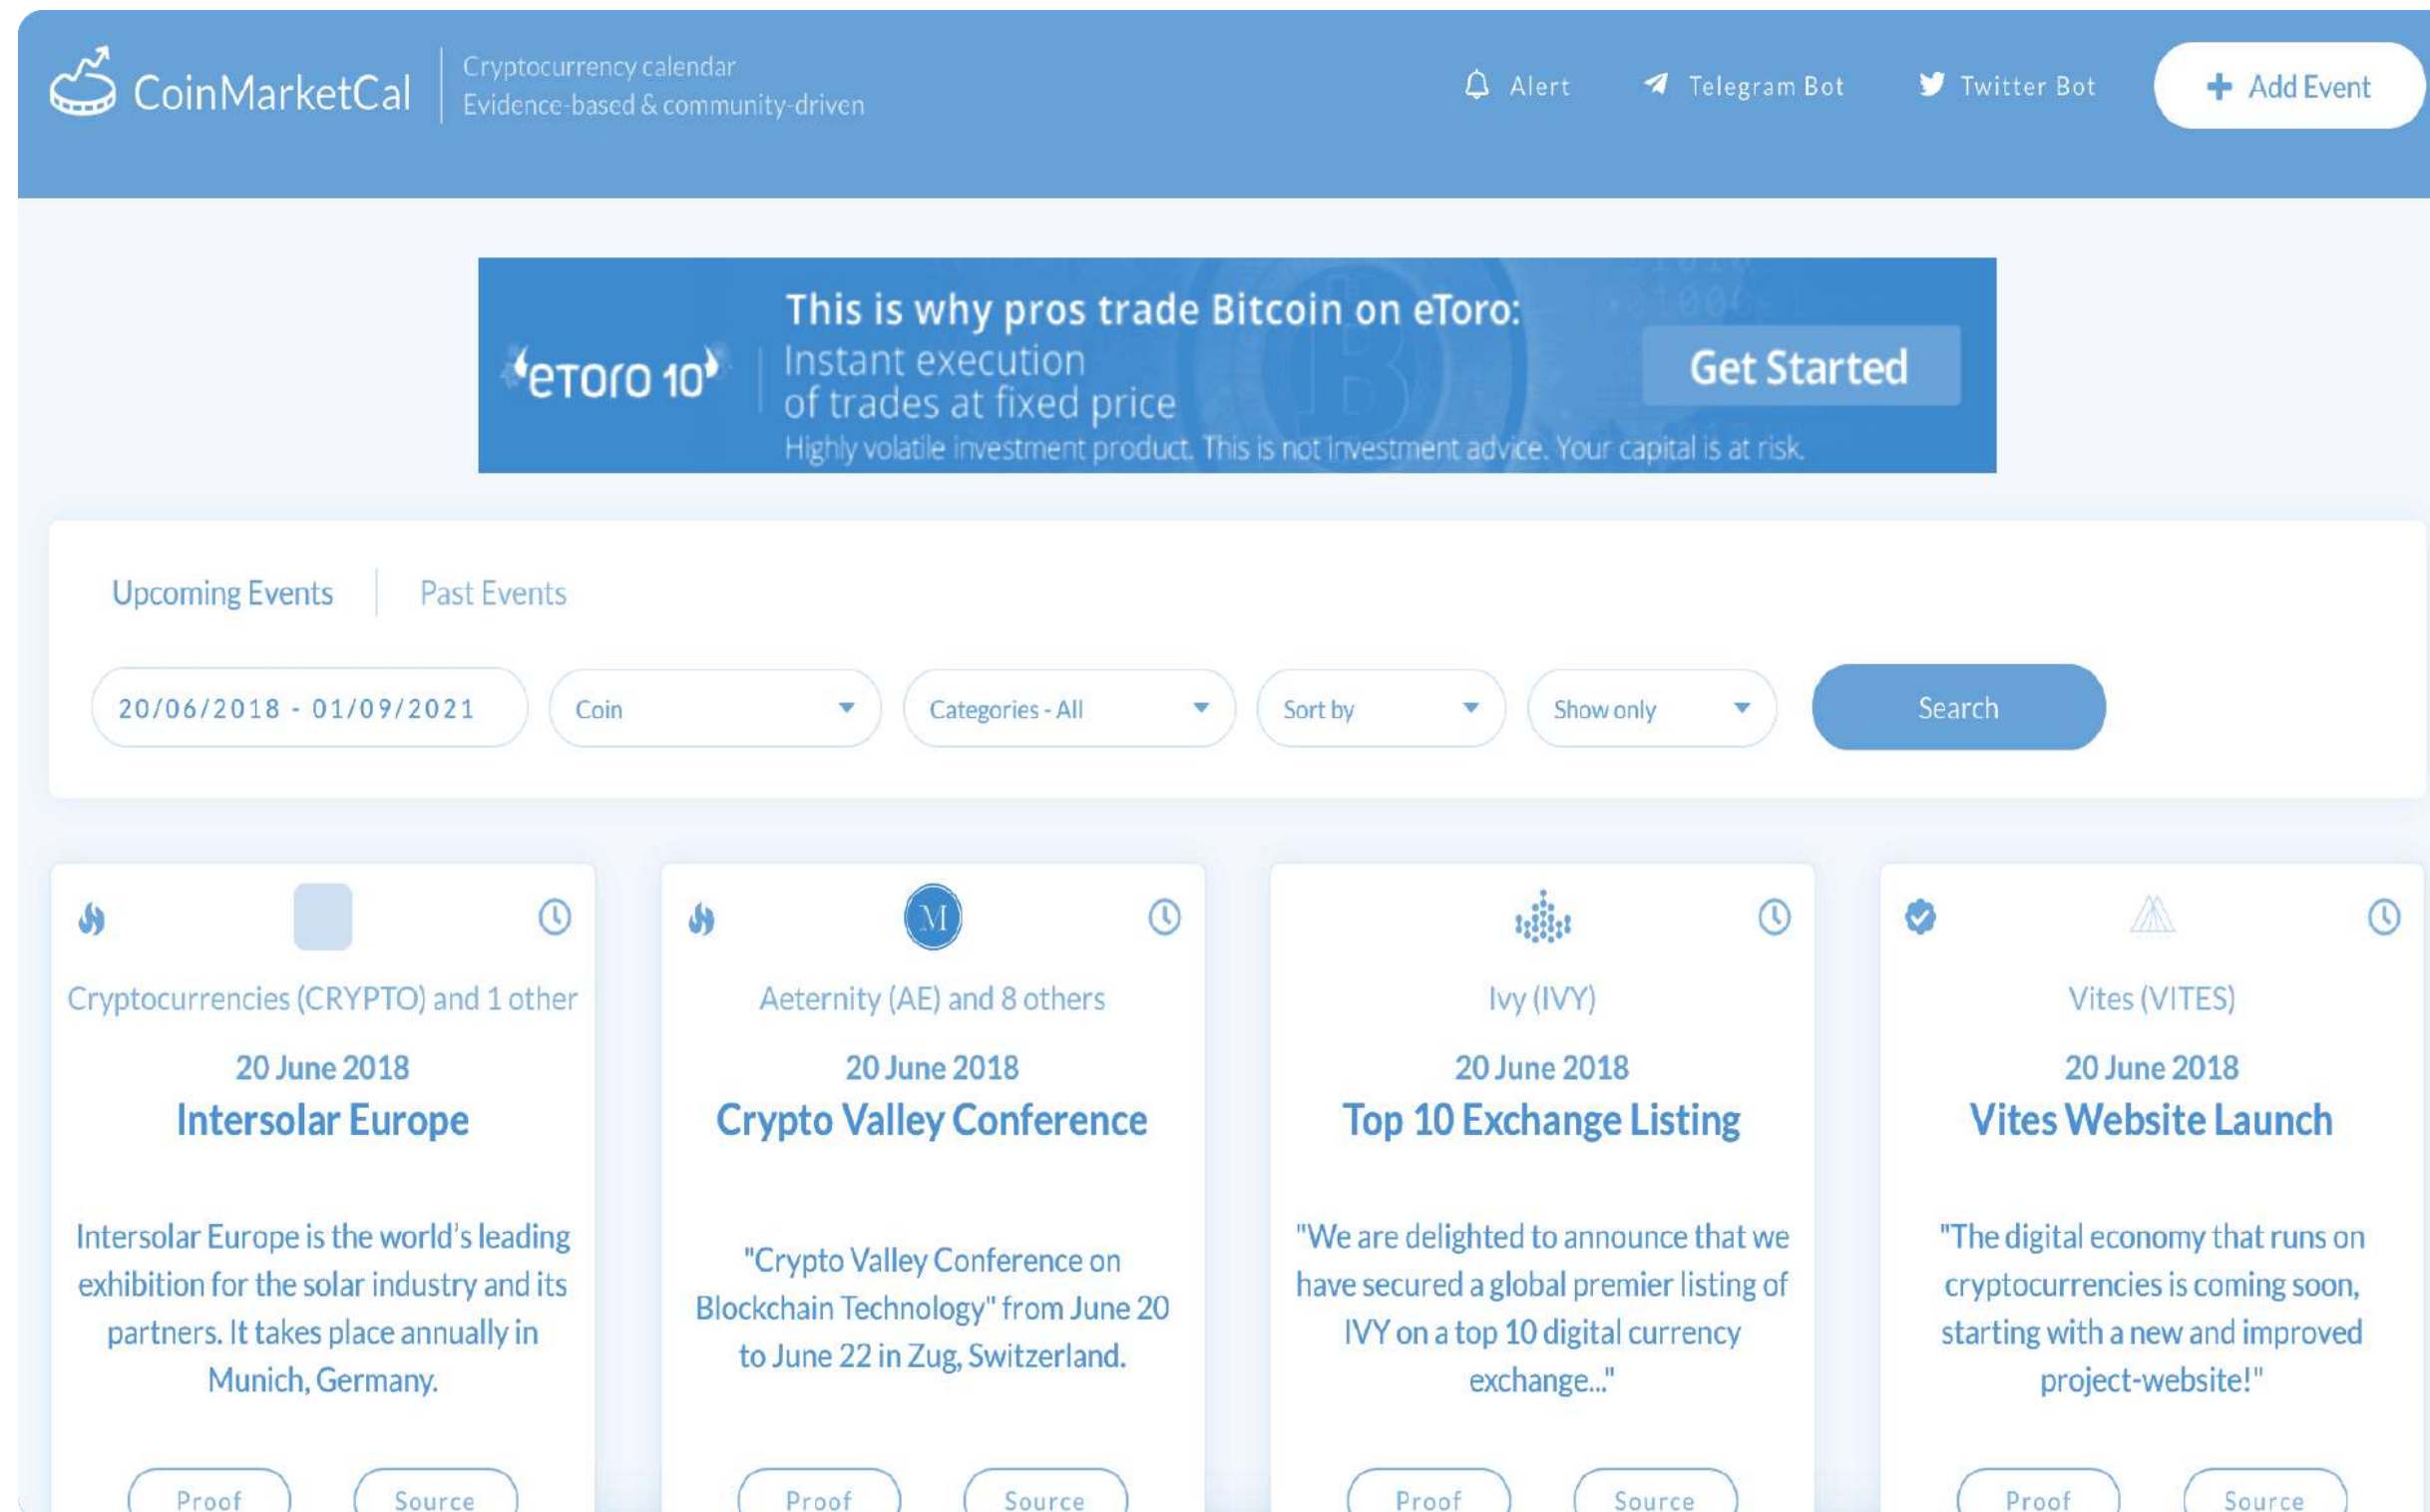

Order book management: pre-pump preparing example

Filling and maintenance of event trackers

STIMULATION OF THE CURRENCY INCREASE USING EVENT-BASED MARKETING

The screenshot displays the CoinMarketCal website interface. At the top, the header includes the CoinMarketCal logo, a description of the site as a "Cryptocurrency calendar Evidence-based & community-driven", and links for "Alert", "Telegram Bot", "Twitter Bot", and an "Add Event" button. Below the header is a blue banner for eToro 10, stating "This is why pros trade Bitcoin on eToro: Instant execution of trades at fixed price" and "Highly volatile investment product. This is not investment advice. Your capital is at risk.", with a "Get Started" button. The main content area features a filter bar with tabs for "Upcoming Events" and "Past Events", a date range selector (20/06/2018 - 01/09/2021), dropdown menus for "Coin", "Categories - All", "Sort by", and "Show only", and a "Search" button. Below the filter bar, four event cards are displayed, each with a coin icon, a date, an event title, a description, and "Proof" and "Source" buttons.

Event Title	Date	Description
